Podcast Process - Round table discussions with Gizmo

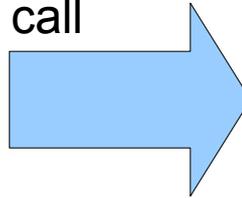

Gizmo has built in recording feature

Use Two PC's

One for Participating on the
conference call

Makes your voice sound the same
as the others

The other for recording the
conference call

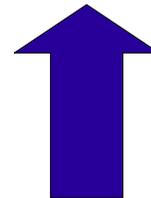

Make sure to record at least 10 seconds
of no talking with everyone off of mute

Use Audacity to

“fix” the recording using the Leveling,
Compression, and Noise Removal effects

Remember those 10
seconds of silence?
Use them as the noise
filter!

Post the file on the web using RSS!

Its easy with

You do use Drupal don't you?
