MEDIA ADVISORY

Eric Hines, CEO of Applied Watch Technologies, Will Speak on Building an Open Source Security Infrastructure at the Northwest Chicagoland Linux Users Group (NWCLUG)

WHEN: Tuesday, May 1, 2007 7:00p-9:45p

WHERE: Northwest Chicagoland Linux Users Group, Harper College, Palatine, IL

WHO: Eric Hines, CEO, Applied Watch Technologies, 877-262-7593, eric.hines@appliedwatch.com.

Applied Watch (www.appliedwatch.com) is the undisputed leader in enterprise open source security management. Its flagship product, the Applied Watch Command Center, is a robust framework for managing open source security software in the enterprise, notably Snort.

WHAT: Mr. Hines will provide a detailed road map for building an entire security infrastructure in the enterprise using some of the hottest trends in open source security software available today. Real-world deployments will be sighted that details how open source is being used in net-centric warfare by the US military for protecting human lives and mission-critical applications in the enterprise.
