Ubuntu 10.4

Ubuntu released their latest version, 10.4 at the end of April. It features a new interface, updated GNOME version, and faster boot, amongst other improvements.

Has anyone tried it? Any impressions? What do you feel Ubuntu lacks?

HP Buys Palm

HP bought Palm and is expected to use PalmOS on tablets and smaller portables. Does anyone expect Linux to gain traction in such markets or will it be mobile OSs and Windows 7?

IE 9 will support only H.264 video

Microsoft has announced IE 9 will only support H.264 and won't support Ogg Theora. Does this say anything about the viability of open source codecs, both for audio and video?
