# Slackware 13.0 Released

Slackware isn't nearly as popular as it was a decade ago. But it still has some followers. What was your first experience with Slackware?

# KDE Struggles With Feature Requests

The KDE crowd has had some problems handling requests in their bug tracking system for new features because requesters can often be abusive or don't accept "no" for an answer.

As an end user, how do you expect software packages to handle feature requests?

# Flash Vulnerability

A vulnerability was found in the popular Flash plug-in. Unfortunately, most people still haven't upgraded. Some of this is due to corporate software requirements.

How should companies handle situations like this? More daring: should there be software restr
