

<p><i>Workstations and Notebooks</i></p>	<p>The Sentry LSW family of workstations and notebooks are Pentium 4 powered and configured for Linux users. Mid-Tower systems come integrated with SUSE Linux 9.2 while notebooks combine SUSE Linux and Sun's Java Desktop. Both include Office software that combines stability, security and a simple user graphical desktop interface for productivity.</p> <p>Systems can be custom configured to address special needs, network environment and budget constraints.</p>
<p><i>Servers</i></p>	<p>The Sentry LSS family of servers comes equipped with Intel Xeon server boards, up to 16GB of RAM and dual gigabyte Ethernet connectivity. Systems range from entry level with the 1U to enterprise level offering redundant hot swap architecture for true server productivity, longevity and reliability.</p> <p>All server systems come integrated with SUSE Linux software that can be configured for File and Print, Application, Disc and Tape backup Storage, Apache Web, Firewall and Mail tasks. SUSE Linux offers journaling file systems, layered security, 128 Bit encryption and password protected BIOS and entry.</p>
<p><i>Storage</i></p>	<p>Storage items includes Coraid Network Attached Storage, RAID subsystems, Tape Backup drives and libraries and CD/DVD ROM drives, recorders, towers or Servers that can be configured for your present network servers or added to the Sentry line of servers to compete the solution.</p>
<p><i>Novell SUSE Software</i></p>	<p>SUSE Linux software distributions come complete with applications, games, tools and utilities along with the award winning 2.6 Linux Kernel. Each SUSE Linux retail software package contains DVD's/CD's and manuals to get you started quickly and easily.</p> <p>Packages available include Personal and Professional 9.2, Standard and Enterprise Server 9 and OpenExchange Email Server 4.1.</p>
<p><i>Arkeia and AntiVir Software</i></p>	<p>Arkeia Backup Software is designed to work with Linux Servers and Unix, Windows and Macintosh clients. It will support multiple backup streams and can be used with any server including special application servers handling MySQL, Exchange or Lotus Notes.</p> <p>AntiVir is an AntiVirus software that plugs into SUSE Linux Servers for protection when file sharing in heterogeneous network environments</p>
